CHAPTER 1

INTRODUCTION

The proposed website is an effective replacement of the current website with improvements in overall site appearance, usability and authenticity. This will give a better outlook of the college to the site visitors. It contains all the information in a structured manner, by which the visitors can access the site easily. In an effort to prioritize an important tool for an organization's communication plan, I undertook the development of a web style guide for college.

I surveyed the published literature and discovered that although much had been written about corporate style guide creation, nothing existed about how to create a web style guide. Additionally, my research on 70 web style guides from peer institutions revealed that there was no correlation between the quality of a web style guide and the quality of the corresponding website-exemplary web style guides were found on sub-par websites, and vice-versa.

Finally, based on a content analysis of web style guides, I developed a new approach for creating a web style guide for higher education institutions. Clearly, there is great variation for what comprises a web style guide, with some leaning towards either the technical or editorial side of the spectrum, as these examples demonstrate. For the purpose of this paper, though, I will categorize Lynch and Horton's topic areas and say that a web style guide is a set of basic design principles which are composed of editorial, visual, and web-specific standards. Put this way, a web style guide becomes more familiar: editorial features derive from traditional style guides or style handbooks, based on a content analysis of web style guides, I developed a new approach for creating a web style guide for higher education institutions,

Purpose

The proposed website content to all requirements for a good college website with all necessary detailing, we hope for achieving a better alignment the proposed website is an effective replacement of the current website with improvement in overall site visitors. It contains all the information in a structured manner, by that the visitor can access the site easily.

SCOPE

This web site is being developed for college and is intended to be used by individuals with web access. Who are interested in obtaining bachelor's degree in computer. This is also very useful for faculty and students of college.

DEFINITION

College website is an integrated web application that handles various academic and non-academic activities of a college/Academic Institute. The system can be accessed by every student/faculty/employees of the institution through internet connected computers or internet enabled mobile devices with the aid of his user name and password. Every user will have a customized home page with his/her profile management facilities. Through links that display in the home page the user can access different options of the website.

CHAPTER 2

OBJECTIVE

Your team will need to build and maintain a website as part of the implementation of your Quest project. This website should serve as the project's portfolio, but also be used to market, communicate, and educate. Your team's website should have a designated spot for each of the following.

- -Mission and VISION Statement
- -Annotated bibliography
- -Abstract
- -Project proposal
- -Marketing tools
- -Team success

Once the website has been built, your team will need to update the site during each implementation cycle to reflect the latest dev. Of your project.

CHAPTER 3

Technology

HTML Basics Welcome to HTML Basics. This workshop leads you through the basics of Hyper Text Markup Language (HTML). HTML is the building block for web pages. You will learn to use HTML to author an HTML page to display in a web browser. Objectives: By the end of this workshop, you will be able to: *f* Use a text editor to author an HTML document. *f* Be able to use basic tags to denote paragraphs, emphasis or special type. *f* Create hyperlinks to other documents. *f* Create an email link. *f* Add images to your document. Q: What is Notepad and where do I get it? A: Notepad is the default Windows text editor. On most Windows systems, click your Start button and choose Programs then Accessories. It should be a little blue notebook. Mac Users: SimpleText is the default text editor on the Mac. In OSX use TextEdit and change the following preferences: Select (in the preferences window) Plain text instead of Rich text and then select Ignore rich text commands in HTML files. This is very important because if you don't do this HTML codes probably won't work. One thing you should avoid using is a word processor (like Microsoft Word) for authoring your HTML

documents. What is an html File? HTML is a format that tells a computer how to display a web page.

USE TECHNOLOGY

CHAPTER 4

Descriptions

Our website is used to access the information about the HHHHHH . In which you can know about the facility, faculty courses and sport activities of college. With the help of this webpage you can gain information at any time and at any place. And for more information you can also send email or call for access the details about RSB college.

CHAPTER 4

Investigation

When we going college and schools then we saw that student face many problems about them future and selecting college. So to provide a easy way to explain about college which a student want to select.

<BODY style="background-color:#E0FFFF"> <H1><U> VISION
AND MISSION:-</U></H1>
<P><H3> The Rai Saheb Bhanwar Singh college has a
bright vision for
a broader prospect that the educational systems should not only focus on imparting
quality education but also should give importance to equip the students with
knowledge, leadership qualities, moral values, personality development and other
skills to face the present day challenges.
The vision can be achieved with the real commitment, involvement and dedication. With
the goals set, monitored well and executed in a time bound process with utmost care
fulfills the vision.

Our mission is to sustain contents and creativity besides stimulating
proximity and participation. We feel it to be fundamental to wake up the young
students to the hard realities of life and the highly competitive scenario which is
fast emerging and limiting the opportunities. We wish to guide them to gain supremacy
in a stiff and highly competitive environment. We train them to acquire the skills
needed for precise planning, positive placement and prompt pro activity.
</H3></P>

CHAPTER 7

Conclusion

The main goal of our website is that every student known about the college and its all the facility. Which is very necessary for student that they know about the college's facility, faculty, courses, bus facility and scholarship.

- It is used to consume the time
- With the help of this webpages you can access basic information about college.
- Easy to access.
